RESEARCH REPORT · 2 NOV 2026

Final report: 10 one-day digital products worth building (Nov 2026)

Prepared 1 Nov 2026 by the lead researcher.

Inputs:

- Phase 1: 5 research files, in `research/phase1/`
- Phase 2: 30 candidates, in `research/phase2/candidates.md`
- Phase 3: 6 validator batches, in `research/phase3/batch-*.md` and `.json`

Read this first: the blunt summary

- **Nothing scored STRONG.** No candidate reached 22/30 on the six-criterion rubric.
  - The best five tie at 21/30, rated VIABLE.
  - Every validator went looking for reasons to reject, and most ideas died.
  - Expect **modest** sales, not a breakout. The binding constraint is **distribution**, not the build.
  - Gumroad is winner-take-most. In an Aug 2026 crawl of 8,311 products, 43% had no ratings. (dataset)
- **Most of the "AI-native" seed ideas lose to free official tools.** Anthropic's free **Claude for Small Business** plugin already does:
  - quotes from voice memos
  - month-end close in QuickBooks and Xero
  - review replies and invoice chasing
  - "turn a task into a skill"

  There are also a free official brand-voice plugin, free vendor MCP servers, Microsoft's free skill-recorder, and a free set of 44 profession plugins. (plugin README, 44-profession set)
  - The validators found conflicting launch dates for the small-business plugin: 13 May 2026 and a 15 Sep 2026 version. Either way, it is live and free.
- **The ideas that survive are less exciting.** They fall into two groups:
  1. **Template kits for a narrow vertical**, sold where buyers already search (Etsy, TPT).
  2. **Kits driven by a regulation or platform change**, for non-technical people facing a dated deadline or a rejection:
     - ADA demand letters
     - A2P 10DLC rejections (the US registration that business text-messaging campaigns need)
     - UK Making Tax Digital, April 2027
     - Etsy's AI-rule change of 22 Oct 2026
- **Platform risk for this founder: Etsy's 22 Oct 2026 AI policy.** Seven of the top 10 would sell on Etsy.
  - Reported content of the policy:
    - AI use must be disclosed.
    - AI prompt bundles are prohibited.
    - AI-generated "functional guides" (instructions, patterns) are banned.
    - Repeat violations can close a shop.

- Sources: Etsy Seller Handbook, Digital Commerce 360, Value Added Resource.
- Caveat: we read these through search summaries, so the exact clause wording is unconfirmed.
- **Rule for every Etsy product below:**
  - Lead with templates and spreadsheets.
  - Write and edit the instructional text yourself.
  - Disclose AI assistance.
  - Sell any prompt or skill files on Gumroad, not Etsy.

How this was done, and what to trust

- **Phase 1:** 5 parallel research agents.
- **Phase 2:** the lead synthesised 30 candidates, including all 10 seed hypotheses.
- **Phase 3:** 6 parallel validators, 5 candidates each. Each one was told to search for competitors and free alternatives and to score down when evidence was missing.
- **Network limits:**
  - This cloud environment's network policy blocked direct page fetches to Reddit, Gumroad, Etsy, TPT, Product Hunt, HN and most blogs. Only github.com loaded.
  - Evidence therefore comes from web-search result summaries, plus the GitHub, npm and MCP-registry APIs and Gumroad scrape datasets hosted on GitHub.
  - Reddit threads appear as **mirror URLs** (reddit.sentinel-team.org), because search returned those, not reddit.com.
  - Etsy and TPT review counts come from search snippets. Some may be **shop-level, not listing-level**.
- **Search budget:** web search had a shared cap of about 200 calls per run. Three of the five Phase 1 agents ran with **zero** web searches and used GitHub and registry data instead. Phase 3 validators got 20 searches each.
- **Skipped step:** the Phase 1 completeness critic and gap-fill step was cancelled when you asked me to speed up. The Phase 3 validators closed the biggest gap, which was checking Etsy and TPT directly via search.
- **Posting rules:** most subreddit and community posting rules could **not** be verified (marked NOT VERIFIED below). Read each sidebar before posting. The rules that were confirmed came from mirror copies and are noted as such.
- **Recency:** most demand evidence is dated Jan to Oct 2026. Undated items are flagged.

Assumptions (no questions asked, per the brief):

- The founder has no existing audience.
- Sales are in USD or GBP through Etsy, TPT, Gumroad or Lemon Squeezy.
- "One day" means a static kit or simple Sheets/Apps Script, with no backend and no vendor partner approvals.
- Compliance-adjacent kits are sold as checklists and templates with "not legal/tax advice" wording, never as "makes you compliant". The FTC's $1M order against accessiBe for unsupported compliance claims is the precedent. (fkks)

Full ranking (all 30 candidates)

Each criterion is scored 1-5. "Comp" is low competition, so 5 means almost no competitors. Total is out of 30. Ties are broken by demand, then willingness to pay (WTP). Any candidate with Comp = 1 (hundreds of near-identical products, or a free official tool) drops below the others on the same total, per your saturation rule.

Rank	ID	Candidate	Dem	Comp	WTP	Build	Dist	Growth	Total	Verdict
1	C03	Therapist progress-note kit (no client data)	4	2	4	4	4	3	**21**	VIABLE
2	C17	Shopify ADA letter-response & fix workbook (seed 4)	4	3	3	4	3	4	**21**	VIABLE
3	C18	A2P 10DLC agency pack	4	2	3	5	3	4	**21**	VIABLE
4	C24	Single-trade ops spreadsheet kit (absorbs C01)	3	2	4	5	4	3	**21**	VIABLE
5	C21	UK Making Tax Digital landlord records workbook	3	2	3	4	4	5	**21**	VIABLE
6	C07	Voice-agent launch-safety kit for agencies (seed 6, absorbs seed 8)	3	2	3	3	4	4	**19**	VIABLE
7	C12	FTC- and Google-safe review-request kit (absorbs seed 2)	3	2	2	5	4	3	**19**	VIABLE
8	C14	Etsy AI-policy listing audit kit	3	2	2	5	3	4	**19**	VIABLE
9	C27	Report-card comment bank, one curriculum (Comp = 1)	3	1	4	5	4	2	**19**	VIABLE, conditional
10	C22	Missing-docs tracker for US tax preparers	2	2	3	4	3	3	**17**	WEAK
11	C28	Independent tutor business kit	2	1	3	5	4	3	18	Excluded: saturated (validator)
12	C23	Freelancer "get paid" kit	4	1	2	5	3	2	17	REJECT (free templates and built-in invoicing reminders)
13	C29	Photographer contract & workflow pack	3	1	3	4	4	2	17	WEAK
14	C04	Realtor AI listing kit (seed 1)	3	1	2	5	3	3	17	WEAK
15	C01	HVAC/plumbing Claude skill pack (seed 1)	3	2	3	4	2	2	16	WEAK, merge into C24
16	C19	UK DUAA complaints procedure pack (data-protection law)	2	2	2	5	3	2	16	WEAK
17	C13	Agentic-commerce readiness checklist	3	2	2	4	2	2	15	WEAK
18	C11	"Get found by AI" kit (seed 2)	2	1	2	4	3	3	15	WEAK, fold into C12
19	C15	Vibe-coder launch safety kit	3	1	2	4	3	2	15	REJECT (Lovable's built-in pre-publish scan; free Cloudflare skill)
20	C30	AI-use policy kit for one regulated profession	3	1	2	4	2	3	15	REJECT (free bar, APA and AICPA templates)
21	C16	EU AI Act starter pack (seed 3)	2	1	2	4	3	2	14	REJECT
22	C08	Chatbot QA kit (seed 8)	1	2	2	5	2	2	14	WEAK, fold into C07
23	C20	CA/NY auto-renewal kit	1	2	2	5	2	2	14	REJECT (Stripe built-ins)
24	C02	Bookkeeper month-end skill pack (seed 1)	2	1	2	4	2	2	13	REJECT (free official close-month skill)
25	C09	Brand voice pack (seed 7)	1	1	2	5	3	1	13	REJECT (free official plugin)
26	C25	TAKE IT DOWN Act pack	1	2	2	4	2	2	13	REJECT
27	C26	School/tutoring AI policy pack (seed 9)	1	1	2	5	2	2	13	REJECT
28	C10	"Agent-ready local business" MCP kit	1	3	1	3	2	2	12	REJECT

Rank	ID	Candidate	Dem	Comp	WTP	Build	Dist	Growth	Total	Verdict
29	C06	Claude connector setup kit (seed 5)	2	1	2	3	2	1	11	REJECT
30	C05	SOP-to-agent converter (seed 10)	2	1	1	4	2	1	11	REJECT

Seed hypotheses: final verdicts

#	Seed	Verdict	Why (details in the batch files)
1	Claude Code / agent skill packs for non-developer professions	**Rejected as "skill packs"** (C01 16, C02 13, C04 17). Survives only as a template kit (C03).	The free official SMB plugin covers about 60-70% of the trades and bookkeeping workflows. A free 44-profession plugin set exists. Paid trade AI kits on Etsy show single-digit ratings. Buyers need a paid Claude plan and must get through plugin installs (batch-1).
2	"Get found by AI search" kits	**Weak (15)**; use as a bonus inside C12	Free graders (BrightLocal, HubSpot, Ahrefs). A free claude-seo skill with about 25k stars. The official SMB plugin has an AI-visibility skill. llms.txt showed no measurable effect (batch-3, REG#4).
3	EU AI Act starter packs	**Rejected (14)**	The Digital Omnibus softened Art. 4, there are no EU fines, and there are no small-business deadlines in the next 6 months. Etsy kits run 2.95–499, and one AI-generated Gumroad catalogue holds 42 such products (batch-4).
4	Accessibility fix kits for Shopify/Wix	**Viable, Shopify only (21)**	Real demand-letter panic. Wix has a free built-in Accessibility Wizard. High claims risk (batch-4).
5	MCP connectors / setup guides	**Rejected (11)**	Aggregators publish 700-1,900 hosted MCP servers each. Official vendor servers exist. Setup failures are vendor bugs that a guide can't fix (Phase 1 G1/G6, batch-2).
6	Voice receptionist templates	**Viable only re-scoped (19)** as a compliance and test kit for agencies	Plain per-trade prompts already sell on Etsy and come free with Skool memberships (batch-2).
7	Brand voice packs	**Rejected (13)**	A free official brand-voice plugin exists (by Tribe AI). Prices are anchored at $9.
8	Chatbot test/QA kits	**Weak (14)**; fold into C07	No buyers or sellers found. Free vendor checklists exist.
9	AI usage policy packs for schools/tutoring	**Rejected (13)**	No tutoring mandate found. TPT sells AI agreements for $0.99 or free, and state model policies are free (batch-6).
10	SOP-to-agent instruction converters	**Rejected (11)**	Anthropic's skill-creator, the SMB plugin's "Automate this" and Microsoft's Skill Recorder already do this free (batch-1).

The top 10

Prices are one-time unless stated otherwise. "Mirror" means the evidence came through a Reddit mirror page that search returned, not reddit.com itself.

1. Insurance-Ready Progress Note Kit for private-practice therapists (C03, 21/30)

Pitch. A Google Sheets note builder plus phrase banks that let a solo therapist write a defensible DAP, SOAP or BIRP note in 3 minutes, without putting client data into any AI tool.

Target buyer. Solo private-practice therapists (LPC, LCSW, LMFT) who bill insurance and write notes in the evening. Pick one sub-niche for the title, such as adult anxiety and depression, or child and play therapy.

Evidence of demand.

- r/therapists documentation threads in Jan, Apr, May and Jun 2026 (mirror):

    - Jan
    - Apr
    - May
    - Jun
- NPR/WFAE, May 2026: therapists use AI for notes, with real client-trust concerns.
- Existing spend: AI scribes and the SimplePractice add-on cost about $35 per clinician per month (Phase 1 PH#1).

Competition snapshot.

- **Etsy is crowded, but it proves people pay.** These review counts may be shop-level:
    - SOAP DAP BIRP Notes Builder Bundle: $14.40, about 827-836 reviews shown.
    - Therapy Note Taking Templates: $14.06, 614 shown.
    - A notes generator: $8.99, 580 shown.
- Free: alexclowe's therapist plugin, and vendor blog templates.
- **Where this is different:** one niche, insurance-ready medical-necessity phrasing, a goal and objective bank, and a client AI-use consent template. "AI" is a bonus, not the headline, because many therapists distrust AI notes.

What to build.

Files:

- `Progress-Note-Builder` (Google Sheets, with an Excel copy). Tabs:
    - How-to
    - DAP builder, SOAP builder and BIRP builder (dropdowns that assemble the note with TEXTJOIN)
    - Interventions by modality (CBT, DBT, ACT, MI, person-centred)
    - Client response
    - Medical-necessity phrases
    - Goals and objectives
    - Risk documentation phrases
- `Phrase-Bank.pdf` : 300+ phrases.
- `Treatment-Goals-Bank.docx` .
- `Client-AI-Use-Consent-Template.docx` , marked "have your board or attorney review".
- `Quick-Start.pdf` .
- *Gumroad edition only:* `No-PHI-AI-Workflow.pdf` , a de-identified shorthand method plus one project instruction. Keep this off Etsy because of the prompt-bundle ban.

Tech: Google Sheets formulas. Claude Code drafts the phrase banks, which you then hand-edit. Playwright renders HTML mockups to PNG for listing images.

Hour-by-hour:

Hour	Work
1	Pick the niche. Check Etsy search for niche terms and note what the incumbents miss. Outline the tabs.
2	Build the Sheets skeleton, dropdowns and note-assembly formulas.
3	Draft the intervention and client-response banks with Claude. Hand-edit against payer medical-necessity language.
4	Goals and objectives bank, risk-documentation phrases. Wire them into the dropdowns.
5	Consent template, quick-start guide, disclaimers: not clinical, legal or billing advice; never put PHI into consumer AI; no "HIPAA compliant" claim.
6	QA: write 5 sample notes end to end in Google Sheets and Excel. Set up a "Make a copy" link.

Hour	Work
7	Mockups, Etsy title and 13 tags, description with AI-assistance disclosure. Gumroad page for the AI edition.
8	Publish on Etsy and Gumroad. Start Etsy Ads at $2/day. Post in the r/therapists weekly thread.

Price. $19 on Etsy (list at $24 with a launch discount). $27 on Gumroad with the AI-workflow bonus. Incumbents anchor at $9-18, so don't go above about $29.

Launch on day one.

- **Etsy** search: "therapy notes template", "SOAP note template", "DAP notes". This is the main channel. (market page)
- **r/therapists:** ads are "removed WITHOUT WARNING", but there is a weekly "CEUs, Resources, Self-Promos" thread. Post only there. Seen via mirror; frequency and limits NOT VERIFIED.
- **Gumroad** for the AI edition.
- Therapist Facebook groups: rules NOT VERIFIED.

Biggest risk. A new zero-review Etsy listing can't outrank the 600-800-review incumbents. **Cheap test:** $19 listing plus $2/day Etsy Ads for 10 days. Kill it if there are fewer than 3 sales.

2. Shopify ADA Letter Response & Fix Workbook (C17, 21/30, seed 4)

Pitch. For the Shopify merchant who just got a law-firm accessibility letter: a calm 48-hour triage checklist, a dated fix log, and click-by-click Shopify fixes for the issues these letters usually allege. All of it hands off to a lawyer and claims no compliance outcome.

Target buyer. US Shopify store owners (roughly 100*k*–2M/yr revenue) who received, or fear, an ADA demand letter. Secondary buyers are freelancers asked to "fix it fast".

Evidence of demand.

- Shopify Community threads (dates not shown in results):
  - Merchant panic after a law-firm letter
  - Long ADA-lawsuit thread: letters cite alt text, unlabeled buttons and forms, contrast and keyboard access; "Most are templates".
  - Merchant sued, asking for help (older)
- EcomBack mid-2026 report: 2,045 ADA website suits in H1 2026; Phase 1 cites about 79% against e-commerce.

Competition snapshot.

- Etsy has generic and multi-platform kits:
  - a Shopify & WooCommerce Accessibility Kit and audit PDFs, priced from a few dollars to about $90
  - an attorney-drafted "ADA Compliant Website" bundle
  - no visible reviews on any of them
- Gumroad has generic WCAG guides.
- Free: the W3C statement generator, free Claude accessibility skills, and 122 "shopify accessibility" GitHub repos.
- Wix has a free built-in Accessibility Wizard, so **drop Wix entirely**.
- **Where this is different:** Shopify-only, built around the *letter* moment (triage, evidence log, attorney hand-off pack), with click paths verified in Dawn. It is not another generic WCAG guide.

What to build.

Files:

- `Letter-Triage-48h.pdf`: what to preserve, forward to counsel, and not say. Framed as an organiser, not legal advice.
- `Shopify-Fix-Guide-Dawn.pdf`: screenshots for:
  - alt text
  - icon-button labels
  - form labels
  - colour contrast via theme settings
  - focus traps in the cart drawer and keyboard navigation
  - video captions
- `Remediation-Log` (Google Sheets): issue, WCAG reference, page, fix, date, evidence link, status.
- `Accessibility-Statement-Template.docx`.
- `Attorney-Handoff-Pack.docx`.
- `Overlay-Warning.pdf`: why a widget is not protection, citing the FTC/accessiBe order.

Tech: a free Shopify Partner development store on Dawn, plus free axe DevTools or Lighthouse for screenshots.

Hour-by-hour:

Hour	Work
1	List the common allegations from the Shopify Community threads. Set up a Partner dev store on Dawn.
2-3	Reproduce each fix in Dawn admin and screenshot it.
4	Remediation-log Sheet with conditional formatting.
5	Statement template, attorney hand-off pack, overlay warning.
6	Claims pass: delete every "compliant", "lawsuit-proof" and "protects you". Add "not legal advice" and a "current as of Nov 2026" stamp.
7	Mockups and listing copy (Etsy plus Gumroad).
8	Publish. Answer 5 Shopify Community letter threads with free, link-free steps.

Price. $29 standard edition. $49 "letter received" edition with the remediation log and attorney pack.

Launch on day one.

- **Etsy:** "accessibility audit" and "ADA website" market pages exist; Etsy's AI-disclosure rules apply.
- **Gumroad.**
- **Shopify Community:** give help without links. A third-party copy of the developer-community code says promotion belongs only in designated areas (source); merchant-forum rules NOT VERIFIED.
- **r/ecommerce** bans self-promotion (mirror), so don't post there.
- r/shopify: NOT VERIFIED.

Biggest risk. Two of them:

- **Legal claims:** the FTC's $1M accessiBe order shows that compliance promises draw enforcement.
- **Buyer behaviour:** panicked merchants may hire a lawyer or buy an app instead.

Cheap test: 14 days on Etsy at $29. Kill it if there are fewer than 2 sales or fewer than 20 favourites.

3. A2P 10DLC Agency Pack for GoHighLevel and Twilio (C18, 21/30)

Pitch. Everything an agency needs to get client SMS campaigns approved on the first or second try. Agencies resell GoHighLevel (GHL) as a white-label CRM, and A2P 10DLC is the carrier registration US business texting requires. The pack covers 10 industries:

- campaign descriptions and sample messages

- privacy and terms clauses
- opt-in copy
- a current table mapping each rejection code to its fix
- a client intake form

Target buyer. GoHighLevel and white-label agency owners registering 5-50 client sub-accounts. Secondary: DIY small-business owners on Twilio or GHL.

Evidence of demand.

- Zoom Community: campaign rejected 20+ times.
- Zoom Community: brand-name mismatch rejection.
- Sinch Community: "Why was my campaign rejected".
- 5+ Fiverr gigs selling rejection fixes, e.g. this one.
- GitHub: 174 "sms privacy policy" repos created since Twilio's 30 Jun 2026 mandate (gh api, 1 Nov 2026).
- Twilio introduced granular rejection codes on 23 Mar 2026 (GHL Scale Up).

Competition snapshot.

- One paid Gumroad guide: "The No-Guesswork A2P Setup for GoHighLevel" with an "Approval Prep Kit".
- One Etsy helper.
- Fiverr services, and agency done-for-you setups at $799-1,500.
- **Strong free alternatives:**
  - GHL help article
  - Hot Prospector's free generator
  - MessageDesk's free checker
- **Where this is different:** multi-vertical, an **agency licence**, and a dated, sourced rejection-code table. The free tools only cover the privacy-policy page.

What to build.

Files:

- `Rejection-Code-Fix-Table` (Google Sheets): code, meaning, fix, Twilio documentation link, last-checked date.
- `Clause-Library.docx`: SMS privacy and terms clauses (program name, frequency, rates, STOP/HELP, no sharing of mobile data).
- `Vertical-Campaign-Sets.docx`: 10 verticals × campaign description, 2-5 sample messages and opt-in checkbox copy.
- `Opt-in-Screenshot-Checklist.pdf`.
- `Brand-Data-Consistency-Checklist.pdf`: legal name, EIN, domain email, website.
- `Client-Intake-Form` (Google Form template).
- `Agency-SOP.pdf`.
- A free lead magnet: the top-15 rows of the code table.

Hour-by-hour:

Hour	Work
1	Gather Twilio error-code docs, TCR rejection reasons and the GHL requirements. Choose the 10 verticals.
2	Build the code table, with every row sourced and dated.
3	Clause library.

Hour	Work
4	Vertical campaign sets and opt-in copy.
5	Brand-data checklist, intake form, SOP.
6	Lead-magnet extract. Disclaimers: "no approval guaranteed", "not legal advice", TCPA consent caution. Changelog.
7	Gumroad product pages and covers.
8	Publish. Post the free table in GHL communities after reading their rules.

Price. $29 single-business edition. $79 agency licence covering unlimited clients.

Launch on day one.

- **Gumroad.** A direct competitor already sells there, so the channel works for this.
- GHL Facebook groups and community: rules NOT VERIFIED.
- r/gohighlevel: NOT VERIFIED.
- Optional: a productised Fiverr "A2P pre-submission review" gig that uses the kit (Fiverr ToS NOT VERIFIED).

Biggest risk. Agencies use the free GHL docs and generators and never pay. Some rejections come from brand data, which no template fixes. **Cheap test:** free lead magnet for 14 days. Kill it at fewer than 50 downloads and 0 upsells.

4. One-Payment HVAC Office Workbook: estimates to invoices to maintenance-agreement renewals (C24 + C01, 21/30)

Pitch. A phone-friendly Google Sheets kit that replaces the parts of Jobber a 1-3-person HVAC shop actually uses: price book, estimate, job, invoice, money owed, and a maintenance-agreement renewal tracker that flags renewals 60 and 90 days out. One payment, no monthly fee.

Target buyer. Solo and 1-3-truck residential HVAC owner-operators who sell maintenance plans and won't pay $49-149/month for field-service software. If eRank shows an HVAC incumbent with 500+ reviews, switch to pressure washing.

Evidence of demand.

- Local-service owner replaced a $200/month field-service subscription (Apr 2026, mirror).
- Field-service software too complex on a phone (May 2026, mirror).
- Contractor cut nightly admin from about 3h to 30 min (Apr 2026, mirror).
- Jobber price changes in 2026 (PricingSaaS Q2 2026), though price trackers conflict.
- An HVAC-R school symposium session on AI workflows for small HVAC owners (2026).

Competition snapshot.

- Etsy trades spreadsheets sell, which proves willingness to pay, but they are crowded and cheap (market page):
  - a landscaping bundle at $8.76 showing "(3.5k)" reviews, possibly shop-level
  - one at $3.99 with 185 reviews
  - a $13.78 tracker with 84 reviews
- HVAC AI prompt kits show only single-digit ratings (market page).
- **Where this is different:**
  - single trade, HVAC-specific
  - a maintenance-agreement renewal engine, which no listing found offers
  - a Jobber/Housecall Pro CSV import tab
  - phone-first layout

What to build.

Files:

- `HVAC-Office-Workbook` (Google Sheets). Tabs:
  - Start Here
  - Price Book
  - Estimates (auto-numbered, PDF export)
  - Jobs
  - Invoices
  - Money Owed (AR aging)
  - Maintenance Agreements (renewal flags)
  - Customers
  - CSV Import (column map taken from Jobber and HCP public help docs)
- `Text-and-Email-Templates.pdf` : renewal reminders, quote follow-ups, payment reminders. Write these yourself; templates carry less risk under Etsy's rules.
- `Quick-Start.pdf` .
- Optional: an Apps Script button that drafts the renewal texts.

Hour-by-hour:

Hour	Work
1	eRank free tier and Etsy search: confirm there is no 500+-review HVAC leader, or switch trades.
2-3	Core flow: price book, estimate, job, invoice.
4	Money-owed tab, agreement tracker with conditional formatting, CSV import tab.
5	Phone test in the Google Sheets mobile app; simplify.
6	Templates and quick-start.
7	Mockups, Etsy copy with a "no monthly fee" comparison (cite the source for any price).
8	Publish. Start Etsy Ads at $1-2/day.

Price. $19 (range $14-24). Anything above about $29 fights a $4-14 price anchor.

Launch on day one.

- **Etsy:** "HVAC spreadsheet", "contractor invoice template", "service agreement tracker".
- r/HVAC: NOT VERIFIED.
- r/hvacadvice: homeowners and end users only (2022 rules via mirror), so don't post there.
- r/sweatystartup and HVAC Facebook groups: NOT VERIFIED.

Biggest risk. A new listing can't outrank $4-9 incumbents with hundreds of reviews. **Cheap test:** 21 days of $1-2/day Etsy Ads. You need at least 1% conversion on 500+ views.

5. UK Making Tax Digital Landlord Records Workbook, 2026/27 and 2027/28 editions (C21, 21/30)

Pitch. A spreadsheet for UK landlords who refuse to switch to Xero. It keeps records in HMRC's property categories, handles joint owners and multiple properties, and produces a quarterly summary that imports into a named bridging tool, so there is no copy-paste. It comes with a one-page April 2027 sign-up and quarterly-deadline guide.

Target buyer. UK landlords with 1-4 properties and £30k-£50k qualifying income, who keep spreadsheets today and are mandated from 6 Apr 2027. Do a sole-trader edition second.

Evidence of demand.

- About 970k more people are mandated in Apr 2027 (The Register); MoneyWeek puts the wave at about 1,077,000.
- HMRC is contacting taxpayers who missed the first quarterly update (ATT, 2026).
- A buyer asking about bridging software (date unknown).
- "Tried using existing Make Tax Digital tools. Gave up. Built my own." (Jan 2026, mirror).

Competition snapshot.

- Etsy already has an MTD cluster, with no review counts visible:
  - a landlord joint-owners sheet at $10.48
  - the MTDMadeSimple shop
  - a music-teacher edition
  - "hmrc spreadsheet uk" runs to at least 4 result pages
- **Free software is the bigger threat:**
  - the GOV.UK finder can filter for free products
  - Starling's free tool for its account holders
  - Clear Books' free plan
  - Magic Tax free bridging
  - NRLA's free bridging template for members
- **Where this is different:**
  - landlord-first, with joint-owner splits
  - **proven** to import into one named bridging tool (most listings don't show this)
  - includes the 2027/28 edition and the April 2027 sign-up guide

What to build.

Files:

- `MTD-Landlord-Workbook` (Excel and Google Sheets). Tabs:
  - Properties
  - Income
  - Expenses by HMRC property category
  - Joint-owner split
  - Quarterly summary (formatted for bridging import)
  - Year-end
- `MTD-2027-Guide.pdf`: sign-up, choosing a bridging tool, quarterly dates (7 Aug, 7 Nov, 7 Feb, 7 May per batch-5), digital-link rules.
- `Bridging-Import-Walkthrough.pdf` with screenshots.

Hour-by-hour:

Hour	Work
1	Read GOV.UK MTD ITSA guidance and the property categories. Pick a free or trial bridging tool.
2-3	Build the workbook.
4	**Prove the import works with the bridging tool** (may need an HMRC sandbox or trial account). This is the riskiest hour.
5	Guide and walkthrough.
6	Check categories against GOV.UK. Disclaimers: "not HMRC-recognised software", "not tax advice".
7	Etsy UK mockups and listing.
8	Publish. Schedule Etsy Ads for Jan-Feb 2027.

Price. £15 per edition (range £12-19), or a £24 landlord + sole-trader bundle. Don't go above about £25.

Launch on day one.

- **Etsy UK:** "hmrc spreadsheet uk", "landlord excel spreadsheet", "making tax digital".
- Not verified: r/UKLandlords, r/UKPersonalFinance, Property Tribes and NRLA forums.
- UK Business Forums is full of vendor spam, so contribute rather than promote.

Biggest risk. Free recognised software, plus zero-review listings among near-identical sheets. **Cheap test:** landlord edition only, with about £3/day of Etsy Ads over 14 days in Jan-Feb 2027. Kill it below 3 sales. Build now so the listing ages before the peak.

6. Voice-Agent Launch-Safety Kit for HVAC and plumbing agencies (C07, 19/30; seed 6, absorbs seed 8)

Pitch. Before an agency puts an AI receptionist on a plumber's phone line, this kit covers:

- the state-by-state AI-disclosure and recording-consent opening lines
- an emergency-triage rule block for gas, carbon monoxide and flooding
- 50 scripted test calls with a pass/fail scorecard
- Vapi and Retell tool-schema JSON
- a client go-live sign-off sheet

Target buyer. 1-5-person AI-automation agencies and freelancers selling receptionists to home-service businesses on $400-2,000/month retainers.

Evidence of demand.

- GitHub "ai receptionist" repos are up 8.8x year on year (Phase 1 TR#3).
- Voice-AI agency communities trade templates:
  - AI Voice Network
  - Voice Offer Lab
- Freelancers sell HVAC/plumbing receptionist builds on Upwork.
- Phase 1 REG#6 found a fragmented legal layer: the FCC treats AI voices as "artificial", CA AB 2905, Utah, Maine, all-party-consent states, and CIPA wiretap suits.

Competition snapshot.

- Per-trade prompts already exist (no reviews visible on any of them):
  - an Etsy HVAC AI Receptionist Deployment Kit
  - a $22 Vapi/Bland/Retell script pack
  - Ciela at $49 per template or $99/month
  - a 179/349 dental kit
- Free: Vapi's prompt reference, GitHub starters, and Skool memberships.
- **Where this is different:** nobody found sells the **compliance + test-call + sign-off** layer. Lead with that, not with prompts.

What to build.

Files:

- `State-AI-Disclosure-and-Recording-Consent` (Google Sheets): one row per state, cited, "current as of Nov 2026", not legal advice.
- `Opening-Lines-and-Consent-Flows.docx`.
- `Emergency-Triage-Block.md`.
- `50-Test-Calls-and-Scorecard` (Sheets).

- `vapi-tools.json` and `retell-tools.json`: booking, transfer, message-taking.
- `Go-Live-Signoff.docx`.
- `README.pdf`.

Hour-by-hour:

Hour	Work
1-2	State table, limited to disclosure states and all-party-consent states, each row cited.
3	Opening lines, consent flows, emergency block.
4	Test calls and scorecard.
5-6	Tool JSON for both platforms, **tested** on a pay-as-you-go Vapi account and number (under $20).
7	Sign-off sheet, README, disclaimers. Make no HIPAA or BAA claims for Vapi or Retell.
8	List on Etsy and Gumroad. Post a free "10 state opening lines" sample.

Price. $39 per trade. $79 for an HVAC + plumbing + dental bundle (dental adds a BAA checklist).

Launch on day one.

- **Gumroad** and **Etsy**: the "ai receptionist" and "ai voice agent prompts" market pages exist.
- **Skool voice-AI communities:** promotion rules NOT VERIFIED.
- **r/automation:** a mirrored rule says to avoid using it "solely as a platform to advertise ... without genuine engagement" (GummySearch copy). Lead with the free sample.

Biggest risk. Agencies see templates as a commodity, and state-law accuracy carries liability. **Cheap test:** first open the competing Etsy listings in a normal browser to read their review counts. Then run a 14-day listing and kill it below 3 sales.

7. Google Review Kit for trades: FTC- and Google-policy-safe (C12, 19/30; absorbs seed 2 as a bonus)

Pitch. Review cards plus what the $3 cards don't include:

- request scripts for each job stage
- a two-step follow-up cadence
- a staff and family review disclosure policy
- a "never do" list (gating, incentives, in-store iPads)
- 20 response templates
- a bonus "be found in Google's AI answers" Business Profile checklist

Target buyer. Owners and office managers of local service businesses (HVAC, plumbing, salons, clinics) who are already searching Etsy for "Google review card".

Evidence of demand.

- Reddit (mirror):
  - Reviews are harder to get than expected (Mar 2026)
  - Real reviews removed, possibly after bulk asks (May 2026)
  - Another review-problems thread (May 2026)
- Etsy buyer search pages: "review request" and "google review card templates".
- Why now:
  - the FTC brought its first Consumer Review Rule suit in May 2026 (Phase 1 REG#5)
  - in-store review iPads now break Google's rules (whito)

Competition snapshot.

- Cards are a $1-6 Etsy commodity.
- Google provides a free review link and QR code.
- Review SaaS blogs give scripts away.
- No standalone *compliant scripts + policy* kit was found.
- **Where this is different:** one trade, the policy-safe layer, and response templates. The cards are just the hero image.

What to build.

Files:

- `Review-Cards` (6 Canva share links, QR codes from Google's own link).
- `Request-Scripts.pdf`: 10 SMS and email scripts, written by hand.
- `Follow-Up-Cadence.pdf`.
- `Staff-Review-Disclosure-Policy.docx`.
- `Never-Do-Checklist.pdf`, citing 16 CFR 465 and Google policy.
- `Review-Responses` (Sheets): 20 responses.
- `Bonus-GBP-AI-Visibility-Checklist.pdf`.

Hour-by-hour:

Hour	Work
1	Read the FTC rule and Google's review policy. Outline the never-do list.
2	Scripts and cadence.
3	Cards in Canva.
4	Response templates.
5	GBP/AI checklist (leave out llms.txt).
6	Hand-edit pass; "aligned with" wording plus "not legal advice".
7	Mockups and listing.
8	Publish on Etsy. Post in the r/smallbusiness weekly promotion thread.

Price. $15 on Etsy (range $12-19). $29 for a 3-trade agency pack on Gumroad.

Launch on day one.

- **Etsy** card search pages.
- **r/smallbusiness:** self-promotion is allowed only in the weekly "Promote your business" thread (from 2024 mirror copies; current sidebar NOT VERIFIED).

Biggest risk. Buyers anchored on $3 cards won't pay $15. **Cheap test:** use the cards as the hero image and put "FTC & Google-safe scripts included" in the title. Kill it at 0 sales after 21 days or 300 views.

8. Etsy AI-Policy Listing Audit Kit, Oct 2026 rules (C14, 19/30)

Pitch. A Google Sheet that audits each of your Etsy listings against the 22 Oct 2026 AI rules: disclosure, functional-guide risk, image rules and prompt-bundle risk. It comes with ready-to-paste disclosure sentences by product type and an appeal letter for wrongful removals.

Target buyer. Etsy digital-download sellers with 50-500 listings (printables, Canva templates, planners, clipart) who used AI somewhere and fear removal or shop closure.

Evidence of demand.

- Etsy forum removal threads (dates not shown):
  - Removed under Creativity Standards

    - Removed "as AI"
    - Canva templates the seller made themselves deactivated
- Press coverage of the 22 Oct change: Retail Dive and Digital Commerce 360.

Competition snapshot.

- **No paid compliance kit was found**. That could mean a gap, or no demand.
- Free: Etsy's own Creativity Standards and handbook article, plus blog explainers that appeared within days.
- **Where this is different:** a working per-listing audit tool, disclosure templates and an appeal letter. The free material only explains the rules.

What to build.

Files:

- `Listing-Audit` (Google Sheets): per-listing rows, dropdown risk flags, conditional formatting, a summary dashboard.
- `Disclosure-Templates.pdf` : 10 product types, written by hand.
- `Appeal-Letter.docx` .
- `Changelog.md` , dated.

Hour-by-hour:

Hour	Work
1	Read the Etsy policy pages and link to them rather than copying them.
2-3	Audit Sheet.
4	Disclosure templates.
5	Appeal letter.
6	Test on 20 sample listings.
7	Listing, with your own AI-use disclosure.
8	Publish.

Speed matters: the change is fresh, and buyers are worried now.

Price. $12 (range $9-15).

Launch on day one.

- **Etsy** (dogfooding the rules).
- **Gumroad.**
- r/EtsySellers: NOT VERIFIED.
- Etsy Community forums: assume promotion is prohibited.

Biggest risk. Two of them:

- Sellers read Etsy's free page and move on.
- Etsy flags the kit itself under the AI-guide rule.

Make it mostly a tool, hand-written and disclosed. **Cheap test:** a $9 listing within 7 days. Kill it at 0 sales after 21 days.

9. Report-Card Comment Bank + Sheets generator for ONE curriculum and grade band (C27, 19/30, conditional)

Condition. TPT is saturated for Ontario banks, and Khanmigo plus several free generators handle the generic "generator" job. That is why Comp is scored 1. **Only build this if a 10-minute TPT search for your chosen jurisdiction and grade band shows fewer than about 20 banks.** Otherwise skip it. It is in the top 10 because teachers visibly pay for banks, and the season is **right now**.

Pitch. Curriculum-locked report-card comments by strand and achievement level, with a Google Sheets merge that handles pronouns, strengths and next steps from dropdowns. No student data ever goes into an AI tool.

Target buyer. Elementary teachers writing 25-30 narrative report cards in a comment-heavy jurisdiction, between now and December.

Evidence of demand.

- Ontario Grades 1-3 bank: 4.72/5 from 203 reviews at $10 (review dates not visible).
- TPT search: many banks priced free to $20.
- 2026 comparison of AI comment tools: the category is active.
- An r/Teachers thread about an AI comment tool (mirror, Jun 2026) is a pitch, so it is weak evidence.

Competition snapshot.

- Ontario banks exist grade by grade with 200+ reviews. TPT already sells Sheets generators.
- Khanmigo is free and unlimited, and Formswrite needs no sign-up.
- **Where this is different:** an underserved jurisdiction or grade band, plus a privacy-safe offline generator.

What to build.

Files:

- `Comment-Bank.docx` : strands × 4 levels, learning skills, next steps.
- `Comment-Generator` (Google Sheets): dropdowns plus SUBSTITUTE/CONCATENATE pronoun merge.
- `Free-Sample-20-Comments.pdf` .

Hour-by-hour:

Hour	Work
1	TPT gap check: go or no-go.
2	Read the official curriculum documents.
3-4	Draft comments with Claude and hand-edit them into curriculum language.
5	Generator Sheet.
6	Repetition and grammar QA.
7	TPT listing plus free sample.
8	Publish. Make Pinterest pins.

Price. $8-10 per grade (the bottom of your band). $25-30 for a multi-grade bundle.

Launch on day one.

- **TPT** search for "report card comment bank" and "report card comment generator". Fee tiers NOT VERIFIED.
- A free sample as a lead magnet.
- r/Teachers: NOT VERIFIED.
- Pinterest: not checked.

Biggest risk. Invisible next to 200+-review incumbents, and the season ends mid-December. **Cheap test:** build one grade band in about 3 hours, list it this week, and expand only if it sells by mid-December.

10. Missing-Docs Tracker for US tax preparers and bookkeepers (C22, 17/30, WEAK)

Honest note. This is WEAK. It is #10 because the higher scorers were saturated or rejected, not because the evidence is good. Build it only after a top-5 product shows traction.

Pitch. A Google Sheet where each client row ticks off the documents they owe. One button drafts a Gmail email listing *only* the missing items. It comes with SMS nudges and "no organizer, no start" engagement-letter wording, ready before January.

Target buyer. Solo US tax preparers and bookkeepers with 30-150 individual or Schedule C clients who don't pay for TaxDome, Karbon or Liscio.

Evidence of demand (weak).

- NJCPA, Jan 2026: don't start until the organizer is back.
- A post on automating receipt-PDF chasing (May 2026, mirror, no body visible).
- A client asking whether monthly document requests are normal (Jun 2026, client side).
- Phase 1 PH#8 rests mostly on vendor sources.
- **No buyer threads asking for this exact tool were found.**

Competition snapshot.

- Etsy already sells:
  - a document request list
  - tax organizers
  - email libraries at about $10-80
- Portal SaaS (Liscio, DocChase) automates the chasing.
- **Where this is different:** the email drafter that lists only the missing items. That feature is hard to show in an Etsy thumbnail.

What to build.

Files:

- `Missing-Docs-Tracker` (Google Sheets): document lists by client type (W-2, 1099-NEC/K, Schedule C, rental) and a status grid.
- An Apps Script "Draft reminder emails" menu that creates Gmail drafts.
- `SMS-and-Email-Nudges.pdf`.
- `Engagement-Letter-Clauses.docx`.
- `Quick-Start.pdf`, including the OAuth consent walkthrough.

Hour-by-hour:

Hour	Work
1	Document lists.
2-3	Tracker.
4-5	Apps Script, tested in a fresh Google account.
6	Templates.
7	Etsy listing, with a GIF of the button.
8	Publish by 1 Dec 2026.

Price. $24 (range $19-29).

Launch on day one.

- **Etsy**: "tax client checklist template", "bookkeeper checklist".
- **r/Bookkeeping** bans self-promotion: Rule 1 "No self-promotion", Rule 2 "No commercial spam" (via mirror). Don't post there.
- r/taxpros and ProAdvisor Facebook groups: NOT VERIFIED.

Biggest risk. Buyers already use a portal or a $15 checklist. **Cheap test:** about $1/day of ads from 1 Dec to 31 Jan. Kill it with 0 sales by 31 Jan 2027.

Cross-cutting launch notes

- **Run three cheap tests in parallel rather than building ten products.** Each Etsy test costs a $0.20 listing fee (per batch-1) plus $1-3/day in ads. Fourteen days of data beats any score in this report.
- **Etsy hygiene for the Oct 2026 rules:**
  - Disclose AI assistance.
  - Hand-write the instructional text.
  - Make templates and Sheets the product.
  - Keep prompt and skill files on Gumroad.
- **Compliance-adjacent kits (#2, #3, #5, #6, #7):**
  - Use "checklist", "organiser" and "starting point" language.
  - Date-stamp each kit ("current as of Nov 2026").
  - Say "not legal/tax advice".
  - Never promise compliance or approval.
  - Unauthorised-practice-of-law limits on selling legal templates were **not** researched. Check them before scaling #2 and #3.
- **Communities:** almost every relevant subreddit bans direct promotion. The verified pattern is a weekly self-promotion thread (r/therapists, r/smallbusiness) or nothing (r/ecommerce, r/Bookkeeping, r/hvacadvice). Marketplace search is your real day-one channel.

If I could only build one tomorrow, build this, because...

Build #1, the Insurance-Ready Progress Note Kit for private-practice therapists.

1. **Buyers visibly pay for this exact format.** Etsy therapy-note templates show 580-836 reviews at $9-18, even if those counts are partly shop-level. That is the strongest willingness-to-pay evidence among all 30 candidates. Every AI-native idea we tested had none.
2. **The pain is constant, not seasonal, and well evidenced in 2026:** r/therapists threads every few months, NPR in May 2026, and existing $35/month AI-scribe spending.
3. **Distribution doesn't need an audience.** Etsy search brings the buyers. r/therapists gives you a sanctioned weekly self-promotion slot.
4. **It is safe to build in one day:** about 6 hours of Sheets and docs, no APIs, and low legal exposure if you never touch PHI and never say "HIPAA compliant".
5. **The free official Claude plugins can't take this buyer.** A therapist browsing Etsy for a note template isn't installing Cowork plugins. The AI angle is a bonus you sell separately on Gumroad, not the thing that has to work.

It is a crowded category, so the bet is a sharp sub-niche and the 10-day, about-$20 Etsy Ads test. Kill it fast if it gets fewer than 3 sales.

Runner-up for next week: #5, the UK MTD landlord workbook. List it now so it has reviews before the Jan-Mar 2027 sign-up rush.
